A motivated final-year student with a solid foundation in MERN stack development and strong problem-solving skills using Java and C. Experienced in building dynamic, responsive web applications and developing RESTful APIs. Adept at writing efficient, clean code and handling real-time data interactions, with a passion for solving complex problems and contributing effectively to a professional engineering team.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, C

Web Technologies: HTML5, CSS3, Tailwind CSS, React.js, Redux Toolkit, REST API's, Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code

Relevant Coursework: Operating Systems, Database Management System(DBMS)

EDUCATION

Vidya Jyothi Institute of Technology Hyderabad, Telangana

2022 – 2026

B.Tech in Information Technology

CGPA: 8.25

PROJECTS

Quickchat

- Developed a full-stack real-time chat application using the MERN stack with JavaScript and Socket.io, enabling instant bidirectional communication with low-latency message delivery.
- Implemented user authentication using JWT, secure session handling, and private messaging with real-time message delivery and online user presence tracking.
- Designed a responsive UI with React.js, incorporating dynamic room management, read receipt indicators, and graceful error handling for network interruptions.

BookMyMovie

- Developed a full-stack movie booking application using the MERN stack and TypeScript, implementing scalable RESTful APIs, reusable React components, and MongoDB-based data management.
- Implemented JWT authentication, role-based authorization (User, Movie Owner, Theatre Owner), and protected routes to secure application resources and enforce access control across multiple user roles.
- Leveraged Redux Toolkit and RTK Query for global state management, API integration, caching, and asynchronous data handling, while building a responsive UI with React Router and Tailwind CSS.

Personal Portfolio

- Developed a fully responsive personal portfolio using React.js and Tailwind CSS, featuring modular components, smooth page transitions, and interactive UI elements optimized for all screen sizes.
- Implemented dynamic project showcases, resume download functionality, and a contact form with direct email integration, improving accessibility and recruiter engagement.
- Followed best practices in component reusability, accessibility, and performance optimization to deliver a professional, production-ready web presence.
